INTRODUCTION

We would like to extend a sincere thank you to the bidders, consignors and others who contributed to the success of our first sale. This, our second sale, contains over 1600 lots of desirable literature for your consideration. Included are many extremely rare and seldom offered important works. Please examine the catalogue carefully. Hopefully, the improved format will ease this chore. Your comments, suggestions, etc. are welcomed.

Please remember that condition is described in the terminology of the antiquarian bookseller. A very good copy is, for example, a nice acceptable copy (except for any noted defects) and, in no way, compares with a very good coin. Additionally, lots will be purchased below your limit where competition permits. Please bid with confidence.

Our next sale is slated for Spring 1977 and promises to be our largest yet. Consignments of entire libraries and/or collections of a specialized nature are respectfully solicited. It is our desire to prepare the best possible catalogue. Consignments will be carefully and accurately catalogued with bibliographic references and annotations where applicable.

Meanwhile, we hope you will find items of interest in this sale.

*All that Mankind has done, thought,
gained or been, it is lying as in magic
preservation in the pages of books.
They are the choicest possessions of men.*

Uniform durable blue buckram. *Publication of this outstanding corpus began in 1873 mainly through the efforts of Reginald Stuart Poole (1832-1894), keeper of the coin cabinet and author of several of the earlier volumes. The final volume, authored by Edward Stanley G. Robinson, originally was published in 1927. Intervening volumes were written by numismatic luminaries Barclay V. Head (1844-1914), Percy Gardner (1846-1937), Warwick Wroth and Sir George Francis Hill (1867-1948). The method of classification is based on the geographical arrangement of Abbot Joseph Hilarius Eckhel (1737-1798) considered by many to be the "father of ancient numismatics". Earlier volumes were issued strictly in catalogue form; later volumes, however, contain extensive historical data. The original edition has long been out of print, complete sets being quite difficult to acquire.
